#### 4. Objectives

Saint-Gobain Canada, Inc. will continue to conduct further research to identify new reduction options and to keep up with industry standards with regards to PM pollution prevention.

#### 5. Progress in Implementing Plan

This does not apply because there are no reduction options possible. There are no reasonable substitutions for these substances and many of the reduction options possible have already been implemented in the past.

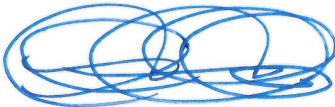

As of June 1<sup>st</sup>, 2016, I, Chris Ciccarelli, certify that I have read the reports on the toxic substance reduction plans for the toxic substances referred to below and am familiar with their contents, and to my knowledge the information contained in the reports is factually accurate and the reports comply with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under that Act, with the exception of the regulatory deadline. The December 31<sup>st</sup> deadline has not been met due to the need to re-assess previous TRA accounting submissions.
